The PET container industry is growing at a rate of over 10% per year and the technologies are evolving rapidly to meet the demands of new filling products like beer, milk and pure fruit juices.

Our seminar provides state-of-the-art information on PET container technologies and offers the opportunity to discuss your specific applications and questions.

Target Audience

Typically our classes are geared for two or three different audiences.

- New Technical and Management Personnel
- Operators, Maintenance and QC, and also Plant Engineering and Management
- Technical Personnel who want to become familiar with more of the details of PET container development and manufacturing

Generally, anyone can benefit from any of the classes given because there is a great deal of interaction between the instructors and attendees. The instructors are also available before and after hours for specific questions.

Technology & Application of PET Containers
